

Voluntary Market Withdrawal - Octagam [Immune Globulin Intravenous (Human)] 5% Liquid Preparation

Octapharma USA Inc. is initiating a voluntary market withdrawal of ALL lots of Octagam® [Immune Globulin Intravenous (human)] 5% Liquid Preparation] currently in the US market. Octapharma has determined, through consultation with the public health authorities at FDA, that until a root cause of the previously reported thromboembolic events can be determined and the problem corrected, the most prudent course of action is to suspend further administration of Octagam®.

Customers are asked to immediately quarantine the use of the product and to contact Octapharma's Customer Service Department at 866-766-4860 to arrange for product return.
