Market Stability in 2018

- The Affordable Care Act is still in effect
- Open Enrollment is shorter: 11/1/17-12/15/17
- Rates for 2018
  - PID required all carriers to:
    - Add a “load” to all rates to account for risk that Individual Mandate is removed.
    - Add a “load” to silver rates to account for the risk that insurers will not receive Cost Share Reduction payments from the federal government. **What does this mean?**
      - On Exchange silvers will have a higher rate increase from 2017 to 2018 (48% on average)
      - On Exchange subsidy-eligible silver members will not feel the impact of the significant rate increase because their subsidies will go up as well.
      - Bronze, Gold, and Platinum plans will have ~14% rate increase, on average.
  - New Off-Exchange-only Silver plans were created for 2018; these will be significantly cheaper (34% less) vs. the On-Exchange silvers (due to no “load” in those plans).
    - Existing 2017 members who bought silver plans Off-Exchange will be mapped into the new Off-Exchange silver plans as this is the most affordable coverage at their existing metallic.
  - The new rates and any plan changes due to mapping will be reflected in the annual renewal letters sent to members
Federal Poverty Levels and Subsidies

It’s important for consumers to know that subsidy eligibility changes every year based on their income.

Importance of updating Healthcare.gov with personal information

Auto-Renewal and Advanced Premium Tax Credits (APTC)

A member’s APTC will change due to changes in income and changes in the premiums.

Due to the rate increases, it is especially critical for those who receive subsidies to update their household information on healthcare.gov. This impacts their 2018 subsidy eligibility.

Marketplace members will be renewed into same plan or same metallic level
What’s new, what’s not?

**NEW**

- Open Enrollment window is now only 6 weeks long (11/1/17-12/15/17)
