At a Glance

UPMC Community HealthChoices (UPMC CHC), of UPMC Health Plan, offers high-quality care to eligible Medical Assistance recipients in the Commonwealth of Pennsylvania. UPMC Community HealthChoices, as one of three state-wide Managed Care Organizations for the Commonwealth’s Community HealthChoices (CHC) program, offers coverage for medical care and Long-term Services and Supports (LTSS) to its Members (also called “Participants”). UPMC Community HealthChoices includes a vast network of medical and home and community-based service providers.

UPMC Community Health Choices took effect January 1, 2018 in Pennsylvania’s Southwest Zone; January 1, 2019 in Pennsylvania’s Southeast Zone; and will be statewide January 1, 2020.

All UPMC CHC providers must abide by the applicable rules and regulations set forth under the General Provision of 55 Pa. Code, Chapter 1101.

⚠️ Alert—Department of Human Services Regulations
This manual may not reflect the most recent changes to Department of Human Services regulations. The Provider Manual is updated at least annually, or more often, as needed to reflect any program or policy change(s) made by the Department of Human Services (DHS) via Medical Assistance bulletins when such change(s) affect(s) information that is required to be included in the Provider Manual. These updates will be made within six months of the effective date of the change(s), or within six months of the issuance of the Medical Assistance bulletin, whichever is later.

If providers have questions regarding UPMC CHC coverage, policies, or procedures that are not addressed in this manual, they may call Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday, or visit www.upmchealthplan.com.

Provider issues identified by Provider Services or Quality Management are addressed on a case-by-case basis, depending on the nature of the issue. If resolution is not achieved during provider’s initial contact, appropriate internal department is engaged and follow-up to provider occurs after issue has been resolved. Issues requiring mass communication are included in the monthly Provider Partner Updates (PPU) newsletter.
Community HealthChoices
Managed Care in Pennsylvania

Pennsylvania’s Department of Human Services (DHS) contracts with three managed care organizations (MCOs) across Pennsylvania to offer managed care to recipients of Medical Assistance who are over the age of 21 and who require Long-Term Services and Supports (LTSS), and recipients who are over the age of 21 and eligible for both Medical Assistance and Medicare, under the Community HealthChoices program.

Community HealthChoices
Recipients choose among managed care organizations contracted with DHS to provide at least the same level of service coverage offered by Pennsylvania’s traditional fee-for-service (FFS) Medical Assistance program and § 1915(c) waiver programs. Behavioral health coverage is provided by behavioral health managed care organizations (BH-MCOs) that contract with state or county departments of human services.

UPMC CHC is one of three CHC-MCOs offered to recipients statewide in a staggered rollout:

- **Southwest Zone (January 2018)** - Allegheny, Armstrong, Beaver, Bedford, Blair, Butler, Cambria, Fayette, Greene, Indiana, Lawrence, Somerset, Washington, and Westmoreland counties

- **Southeast Zone (January 2019)** – Bucks, Chester, Delaware, Montgomery and Philadelphia counties

Medical Assistance recipients who are over the age of 21 and receive LTSS and dual eligible Medicare/Medicaid recipients can enroll in a CHC-MCO or change plans with the assistance of an independent enrollment broker. Recipients may call the Independent Enrollment Broker at 1-844-824-3655 or visit www.enrollchc.com. TTY users should call toll-free 1-833-254-0690.
Population Served

Individuals participating in Community HealthChoices are at least 21 years old and:

- Receive Medicare and Medicaid (dual eligible), or
- Receive Medicaid and LTSS because their level of care makes them nursing facility eligible

Individuals are not eligible for CHC if they are:

- Receiving LTSS in the OBRA waiver and are not nursing facility clinically eligible; or
- An Act 150 program Participant, who is not dually eligible for Medicare and Medicaid; or
- A person with an intellectual disability or autism who is receiving services beyond supports coordination through the Office of Developmental Programs; or
- A resident in a state-operated nursing facility, including the state veterans’ homes.

Closer Look at the CHC population

- Participants may reside in a nursing facility or in the community

- Participants have the option of choosing UPMC CHC or one of two other CHC-MCOs for their Medicaid and LTSS coverage:
  - Participants who are dual eligible may have different insurance plans for CHC and Medicare
  - Participants may choose UPMC CHC as their Medicaid Plan but choose another insurer for their Medicare coverage that is not UPMC
  - Participants may choose UPMC CHC as their Medicaid Plan and choose UPMC for their Medicare coverage (UPMC for Life Dual or UPMC for Life Medicare Advantage Plan)

- Physical health providers do not need to be in UPMC CHC’s network to provide services to dually eligible Participants. Medicare providers can continue to see their patients and receive Medicare reimbursement.
  
 ➢ See Coordination between Medicare and UPMC Community HealthChoices, UPMC CHC (Medical Assistance), Chapter N

- Participants with LTSS eligibility will have access to services and supports not generally provided by traditional Medicare or Medicaid physical health coverage.
  
 ➢ See Covered Benefits, UPMC CHC (Medical Assistance), Chapter N.
Coordination Between Medicare and UPMC Community HealthChoices

For Participants who are dual eligible, Medicare is the primary payer and UPMC CHC is the secondary payer. Participants can choose any Medicare provider or plan. UPMC CHC works with all Medicare providers and plans to coordinate services.

UPMC CHC pays Medicare deductibles and coinsurance for Medicare-covered services at the contracted rate. UPMC CHC does not pay copayments or cost-sharing for Medicare Part D prescriptions.

If there is no contracted rate or if the provider is not in UPMC CHC’s network, UPMC CHC pays deductibles and coinsurance up to the applicable Medicaid fee schedule rate for the service.

For Medicare services that are not covered by Medicaid or UPMC CHC, UPMC CHC pays cost-sharing to the extent that the payment made under Medicare for the service and the payment made by UPMC CHC does not exceed 80% of the Medicare-approved amount.
Covered Benefits

At a Glance

UPMC CHC network providers supply a variety of medical benefits and LTSS services, some of which are itemized on the following pages. For specific information not covered in this manual, call Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday. CHC includes but is not limited to all Medicaid FFS physical health services identified in the Medicaid State Plan and CHC 1915(c) Waiver services.

*An Abortion is a covered service only when a physician has found, and certified in writing to the Medicaid agency that, on the basis of that physician’s professional judgment, the life of the mother would be endangered if the fetus were carried to term (which is in accordance with 42 CFR 441.202).

Definitions for Physical Health Services may be found in the Pennsylvania Medicaid State Plan at: [www.dhs.state.pa.us/publications/medicaidstateplan/](http://www.dhs.state.pa.us/publications/medicaidstateplan/)

### Table N2: CHC Covered LTSS Benefits*

**Nursing Facility Services**

Nursing Facility Services are professionally supervised nursing care and related medical and other health services furnished by a healthcare facility licensed by the Pennsylvania Department of Health as a long-term care nursing facility under Chapter 8 of the Healthcare Facilities Act (35 P.S. §§ 448.801-448.821) and certified as a nursing facility provider in the MA Program (other than a facility owned or operated by the Federal or State government or agency thereof).

Nursing facility services include services that are skilled nursing and rehabilitation services under the Medicare Program and health-related care and services that may not be as inherently complex as skilled nursing or rehabilitation services, but which are needed and provided on a regular basis in the context of a planned program or healthcare and management.

A Participant must be NFCE to receive nursing facility services under the CHC Program. Nursing Facility Services includes at least the items and services specified in 42 C.F.R. § 438.1(c)(8)(i). Nursing facility services are covered as defined in 55 Pa. Code § 1187.51.

➤ **NOTE:** Some services are included on the CHC Covered Physical Health Services list and the CHC LTSS Benefits list. The CHC LTSS Benefits are available only after the Participant’s State Plan, Medicare or private insurance limitations have been reached, or the service is not covered under the State Plan, Medicare or private insurance.

*Definitions for the LTSS listed above can be found in the 1915(c) Home and Community Based Services Waiver, as may be amended from time to time, found at:

To learn more about LTSS covered services, contact Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.
Key Points

UPMC CHC covers:
- Emergency services.
- LTSS for eligible CHC Participants.
- PCP visits.
- Prenatal care.
- Specialist visits with a verbal referral and coordinated by a PCP.

Coordinated Care
The Participant’s PCP must coordinate care. If the PCP refers a Participant to a network specialist and indicates a need for diagnostic testing, the Participant should be directed to a network facility for that testing. A separate referral by the specialist is not required.

When needed, Participants can seek a second opinion from a qualified provider within the Network, at no cost to the Participant. If a qualified Provider is not available within the Network, the Participant will receive assistance in obtaining a second opinion from a qualified provider outside the Network, at no cost to the Participant, unless copayments apply.

In providing and coordinating care, providers must distinguish between traditional treatments and non-traditional methods consistent with Participants’ racial, ethnic, linguistic, or cultural backgrounds.

Upon notification by the Participant, family member, Participant’s legal designee, or a hospital emergency department, the Participant’s PCP must coordinate any care related to an emergency. Participants may self-direct their care for routine gynecological examinations, family planning, maternity care or prenatal visits, dental care, vision care, and Indian healthcare providers.

To verify the coverage of any service contact Provider Services at 1-844-860-9303 or visit www.upmchealthplan.com.

All payments made to providers by UPMC CHC constitute full reimbursement to the provider for covered services rendered. Please refer to the provider contract for specific fee schedules. If UPMC CHC imposes copayments for certain covered services and a Participant cannot afford to pay the copayment, providers must render covered services to the Participant despite nonpayment of the copayment by the Participant. This shall not preclude providers from seeking payment for the copayments from Participants after rendering covered services.

A provider may bill a UPMC CHC Participant for a noncovered service or item only if, before performing the service, the provider informs the Participant:
- Of the nature of the service;
- That the service is not covered by UPMC CHC and UPMC CHC will not pay for the service; and
- Of an estimate of the cost to the Participant for the service.

The provider should document in the medical record that the Participant was advised of his or her financial responsibility for the service.
Standards for Participant Access to Services (Wait Time for Appointments)

The Department of Human Services’ (DHS) standards require that Participants be given access to covered services in a timely manner, depending on the urgency of the need for services, as follows:

- A Participant’s average office waiting time for an appointment for routine care is no more than **30 minutes** or at any time no more than up to **one hour** when the physician encounters an unanticipated urgent medical condition visit or is treating a Participant with a difficult medical need.

➤ See additional Appointment Standards in charts below.

➤ **NOTE:** The following information is provided to the Participants in the Participant Handbook.

**New Participants**

Ambulance
Participants do not need prior authorization for transportation related to emergency medical conditions.

All requests for medically necessary Medicaid covered non-emergency transportation must be coordinated through UPMC Medical Transportation at 1-877-521-RIDE (7433) or PARC at (412) 647-7180 for the following:

- Air ambulance
- Ground ambulance
- Wheelchair van transportation

Closer Look at Routine Medical Transportation
Participants should contact the Medical Assistance Transportation Program (MATP) county offices to arrange for most routine nonemergency transportation. MATP requires 24- to 72- hour notice and provides nonemergency transportation to and from MA-billable (compensable) nonemergency medical services, e.g., from home to the doctor’s office for a routine visit.

If the Participant has an unusual nonemergency transportation need due to a medical condition, the UPMC CHC Health Care Concierge Team can be contacted for assistance.

The UPMC CHC Health Care Concierge Team can be reached 24 hours a day by calling 1-844-833-0523. TTY users should call toll-free 711.

UPMC CHC Participants with LTSS have Service Coordinators who can assist Participants to sign up and schedule rides with MATP. For more information contact Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.

- See Medical Assistance Transportation Program (MATP) County Offices, Welcome and Key Contacts, Chapter A.

Ancillary Services
Ancillary services are covered when coordinated by a participating provider and rendered by a participating provider for medically necessary services covered by the Medical Assistance fee schedule. Some services may require prior authorization review. Certain CHC Participants are eligible for Long-term Services and Supports and may receive home and community-based services coordinated by a Service Coordinator.

- See Procedures Requiring Prior Authorization, Utilization Management, Chapter G.
- See Covered Benefits, UPMC CHC (Medical Assistance), Chapter N.
Chiropractic Care
UPMC CHC Participants may self-direct to chiropractic care. Chiropractic services are covered when delivered by a network provider. UPMC CHC covers only one evaluation per year and medically necessary manual spinal manipulations.

➤ **NOTE:** UPMC CHC will not cover X-rays when performed by a chiropractor; however, chiropractors may refer Participants to a network provider for X-rays.

Dental Care
Avesis, Third Party Administrators Inc., administers routine dental benefits for UPMC CHC Participants. Participants may self-direct their dental care to a network provider.

• Providers may call Avesis directly at 1-888-209-1243.
• Participants may call Avesis directly at 1-833-241-4245.
• TTY users may call toll-free 711.

Dental Services
UPMC CHC Participants who do not live in a nursing home or intermediate care facility (ICF) are eligible for the following services:

• One dental exam (oral evaluation) and cleaning (prophylaxis), every 180 days.
  o Additional oral evaluations and prophylaxis will require a benefit limit exception (BLE).

• One partial upper denture or one full upper denture; and one partial lower denture or one full lower denture.
  o Service is covered once per lifetime.
  o Additional dentures will require a BLE.

➤ **NOTE:** If Medical Assistance paid for a partial or full upper denture since April 27, 2015, the Participant can only receive another partial or full upper denture if they qualify for a BLE.

➤ **NOTE:** If Medical Assistance paid for a partial or full lower denture since April 27, 2015, the Participant can only receive another partial or full lower denture if they qualify for a BLE.

The following services are not covered unless the Participant qualifies for a BLE:

• Crowns and adjunctive services
• Root canals and other endodontic services
• Periodontal services
A provider may not bill a Participant for services that exceed the limits unless the following conditions are met:

- The provider has requested an exception to the limit and the request was denied.
- The provider advised the Participant, before the service was provided, that he or she will be responsible for payment if the exception is not granted.
- The provider advised the Participant, before the service was provided, that the Participant has exceeded the limits.
- The provider advised the Participant, before the service was provided, and documented the discussion in the medical record. The provider may have the Participant sign an advanced notification form.

An exception to the dental service limits may be granted if the Participant meets certain criteria.

➢ See Program Exception Process, UPMC CHC (Medical Assistance), Chapter N.

**Dental Limits**

The following dental benefits and limits apply to Participants including Participants who reside in personal care homes and assisted living facilities.

The dental limits do not apply to adults who reside in a nursing facility or an intermediate care facility (ICF).

➢ See Table N4: Dental Limits, UPMC CHC (Medical Assistance), Chapter N.

*Intermediate Care Facility

**If braces were put on before the age of 21, services will be covered until they are completed or until age 23, whichever comes first, as long as the participant remains eligible for Medical Assistance.

***Medically necessary dental care such as:

- Oral surgery and impacted teeth removal if the nature of the procedure or the Participant’s compromising condition would cause undue risk if performed on an outpatient basis.

- Teeth extraction and dental restorative services for a Participant who is unmanageable and requires general anesthesia by an anesthesiologist, due to a severe mental and/or physical condition.

Diagnostic Services

These services include laboratory services, x-rays, and special diagnostic tests. They are covered when ordered by a network provider and performed by a network ancillary provider.

Refer to the Participant’s behavioral health managed care organization for coverage of diagnostic services related to mental health and substance abuse.

- See Mental Health and Substance Abuse Benefits, UPMC CHC (Medical Assistance), Chapter N.
- See UPMC CHC Behavioral Health Services – Table A2, Welcome and Key Contacts, Chapter A.

Closer Look at Laboratory Services

The Department of Human Services requires that a current Clinical Laboratory Improvement Amendments (CLIA) certification be on file with the Office of Medical Assistance Programs (OMAP) for any provider who renders laboratory services to Medical Assistance Recipients. All laboratory testing sites, including physician’s offices, are required to have a CLIA certificate. The CLIA certificate and accompanying identification number identify those procedures that the laboratory is qualified to perform.

There are several different types of CLIA certifications:

- Certificate of Accreditation
- Certificate of Compliance
- Certificate of Provider Performed Microscopy Procedures (PPMP)
- Certificate of Registration
- Certificate of Waiver (CLIA Waived)
Federally Qualified Health Centers (FQHCs) and Rural Health Clinics (RHCs) are required to submit their CLIA certificates even though they are paid an all-inclusive per encounter payment rate that includes laboratory tests provided at the time of a face-to-face visit. Hospital laboratories are to be Medicare certified or certified by the Pennsylvania Department of Health (DOH) as meeting the standards comparable to those of Medicare.

Out-of-state hospitals do not need to be licensed by DOH but must have current Medicare certification.

➢ See Medical Assistance Bulletin number: 01-12-67, 08-12-62, 09-12-63, 28-12-01, 31-13-65, 33-13-61, effective January 1, 2013, for additional information.

Education
Participants are eligible for the following health education classes:

• Breastfeeding
• Diabetes management
• Maternity
• Smoking cessation
• Nutritional counseling

Closer Look at Education
Contact the Health Management Department at 1-866-778-6073 for information on education classes.

Emergency Care
UPMC CHC will cover care for emergency medical conditions with acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in:

• Placing the health of the Participant (or for pregnant women, the health of the woman or her unborn child) in serious jeopardy;
• Serious impairment to bodily function; or
• Serious dysfunction of any bodily organ or part.
Closer Look at Emergency Care

The hospital or facility must contact Utilization Management at 1-844-849-2926 within 48 hours or on the next business day following an emergency admission.

Participants with an emergency medical condition or those acting on the Participant’s behalf have the right to summon emergency help by calling 911 or any other emergency telephone number, or a licensed ambulance service, without getting prior approval from the Participant’s PCP or from UPMC CHC.

Redirected Emergency Department Visit

If a Participant is instructed by their PCP to come into the office, but instead goes directly to the emergency department and does not have an emergency medical condition, the visit may be considered a redirected emergency department visit. Such visits are subject to review on a case-by-case basis to determine the appropriate level of reimbursement.

Alert - Redirected Emergency Department Visit

Within 24 hours of redirecting an emergency department visit, the PCP must contact the Participant with any alternative care arrangements, such as an office visit or treatment instructions.

Hearing Exams/Aids

Hearing exams require a PCP referral. Participants who are eligible for LTSS may qualify for hearing aids.

➢ See Covered Benefits, UPMC CHC (Medical Assistance), Chapter N.

Home Health Care

Home health care services are covered when coordinated through a network provider and include:

- Home health aides—requires prior authorization
- Home infusion therapy
- Medical social services
- Occupational therapy
- Physical therapy
- Registered dietitian services
- Skilled/Intermittent nursing
- Speech therapy

Participants who are eligible for LTSS may qualify to receive additional home health benefits. The provider should contact Utilization Management for a prior authorization review of medical necessity to receive coverage of home health aide services in the home.
Providers may request prior authorization by logging on to www.upmchealthplan.com and entering the authorization request or by calling 1-844-849-2926. Failure to obtain authorization will result in denial of the claim. If written information is required, it may be sent to:

UPMC Health Plan
Utilization Management Department
U.S. Steel Tower
600 Grant Street, 11th Floor
Pittsburgh, PA 15219

➤ See Covered Benefits, UPMC CHC (Medical Assistance), Chapter N.

Home Medical Equipment (HME)
Home medical equipment (e.g., hospital beds, manual wheelchairs, walkers, or respiratory equipment including oxygen therapy) is covered when coordinated through a network provider and used for medically necessary services that are on the Medical Assistance fee schedule.

Specialized Home Medical Equipment (SHME)
Specialized home medical equipment, including but not limited to: power mobility devices (e.g., power wheelchairs and scooters), pressure reducing support surfaces, lymphedema pumps, and bone growth stimulators, require a prior authorization review and are covered when coordinated through a network provider and when used for medically necessary services that are on the Medical Assistance fee schedule.

The provider must contact Utilization Management for a prior authorization review of medical necessity to receive coverage of SHME. Providers may request prior authorization by logging onto www.upmchealthplan.com and entering the authorization request or by calling 1-844-849-2926. Failure to obtain authorization will result in denial of the claim.

If Specialized Home Medical equipment needs exceed standard benefit coverage, Participants who are eligible for LTSS may qualify to receive additional medical equipment benefits.

➤ See Covered Benefits, UPMC CHC (Medical Assistance), Chapter N.

Home Physician Visits
Home physician visits are covered when provided by a network provider. Specialist visits require a referral from the Participant’s PCP.

Hospice Care
Hospice care is available for a terminal diagnosis with a prognosis of six months or less. This care must be coordinated through a network provider.

Hospital Admissions
Admissions to hospitals are covered if medically necessary and the provider and hospital facility obtain prior authorization from UPMC CHC. If a specialist admits the patient, the specialist should coordinate care with the Participant’s PCP.
Immunizations
UPMC CHC covers certain adult immunizations. Call Provider Services at 1-844-860-9303 for more information.

Mental Health and Substance Abuse Benefits
UPMC CHC does not manage Participants’ behavioral health benefits. Mental health and drug and alcohol treatment is available through coordination with Behavioral Health Managed Care Organizations (BH-MCOs). These services include care for those with mental health needs, substance use needs or diagnoses, and those with dual behavioral health diagnoses (mental health and substance use diagnoses). Commonly available services include **24-hour care** and rehabilitation for alcohol or other drug problems in a hospital or nonhospital setting, services for detoxification from alcohol or other drugs, outpatient services for substance use treatment, peer-delivered support services, and crisis services as needed. Also included are medication-assisted treatment for substance use disorders, for example methadone maintenance or suboxone treatment.

To refer for mental health and drug and alcohol treatment, providers can directly contact the BH-MCO in the Participant’s county. Upon referral, the BH-MCO will coordinate appropriate appointments and/or treatment plans with providers based on specific mental health and drug and alcohol treatment needs and conditions. Participants with LTSS benefits may be eligible for additional benefits. Providers should contact the [Service Coordination department](#) at 1-844-860-9302 (Southwest Pennsylvania), or 1-833-672-8078 (Southeast Pennsylvania), or 1-833-280-8508 (Remainder of Pennsylvania) when coordinating care for Participants with LTSS.

- See Table A2: UPMC CHC (Medical Assistance Contacts), Welcome and Key Contacts, Chapter A.

Office Visits
PCP visits are covered. Specialist visits are covered with a PCP referral and coordination

Closer Look at Referrals
UPMC CHC **does not require the submission of paper referral forms.** PCPs may refer a Participant to a network specialist following standard medical referral practices such as calling the specialist or by providing the Participant a “script” or letter for the specialist’s records. The PCP and specialist should coordinate care. The PCP and specialist will need to contact Utilization Management at 1-844-849-2926 for prior authorization approval of an out-of-network referral.

- **NOTE:** Out-of-network Indian Tribe, Tribal Organization, or Urban Indian Organization Health Care Providers (I/T/U HCPs) can refer Indian Participants (as defined by 42 CFR § 438.14(a)) to in-network providers.

Organ Transplants
Certain organ transplants are covered but require prior authorization from UPMC CHC. Participants must receive a referral from their PCP for specialist and diagnostic work-ups.
Out-of-Area or Out-of-Network Care
Routine care performed by out-of-network providers is not covered for UPMC CHC Participants.

Care for an emergency medical condition, provided by an out-of-network provider, is covered. Participants are encouraged to notify their PCPs after they receive such care.

Medically necessary non-emergency services may be covered if:

- It is unreasonable to expect the Participant to return to the UPMC CHC service area for treatment and prior authorization is obtained.

- Delay would result in a significant decline in the Participant’s health. Urgent conditions that may justify out-of-area care (by an out-of-network provider) include, but are not limited to, prolonged vomiting, severe cramps, burns, severe diarrhea, and minor lacerations.

- Medically necessary services are not available in the UPMC CHC provider network and a prior authorization is obtained.

UPMC CHC Participants are not permitted to self-direct to out-of-network providers except for emergency services or for family planning services; however, providers can request out-of-network care. The provider should call Utilization Management at 1-844-849-2926 for a prior authorization.

A medical director will review the prior authorization request for medical necessity. The provider will be notified of the determination by phone. If the request is denied, the provider and Participant will receive written notification. The provider can appeal a denial by following the instructions outlined in the denial letter.

Participants who receive LTSS may be eligible to receive out-of-area services when traveling. Provider or Participant should call Service Coordination at 1-844-860-9302 (Southwest Pennsylvania), or 1-833-672-8078 (Southeast Pennsylvania), or 1-833-280-8508 (Remainder of Pennsylvania) for prior authorization.

⚠️ Alert – Out-of-Network Care Referrals
To send Participants to out-of-network specialists or facilities, providers must obtain prior authorization from Utilization Management by logging onto www.upmchealthplan.com and entering the authorization request or by calling 1-844-849-2926. Failure to get authorization will result in denial of the claim. The referring provider must give the reason for the out-of-network referral.

If written information is required, it may be sent to:

UPMC Health Plan
Utilization Management Department
U.S. Steel Tower
600 Grant Street, 11th Floor
Pittsburgh, PA 15219
Alert - Services Provided Outside the United States
Emergency and routine care provided outside the United States is not covered. The Affordable Care Act of 2010 prohibits payments to institutions or entities located outside of the United States. United States is defined to include the District of Columbia, Puerto Rico, Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa.

Outpatient Surgery
Medically necessary outpatient surgeries listed on the Medical Assistance fee schedule are covered if performed by a network provider, hospital, or surgical facility. The provider must coordinate care with the Participant’s PCP and contact Utilization Management to obtain authorization for procedures as appropriate. Providers may request prior authorization by logging onto www.upmchealthplan.com and entering the authorization request or by calling 1-844-849-2926.

Podiatric Care
Medically necessary podiatric care is covered with a referral from the Participant’s PCP.

Prescription Drug Coverage
The UPMC CHC prescription plan features a closed, two-tier formulary and mandatory generic utilization, when available. Quantity limits, once-daily dosing, benefit exclusions, copayments, and prior authorization programs may apply.

The plan offers limited over-the-counter products, when written on a prescription, including smoking cessation aids and birth control. Participants must use the UPMC CHC pharmacy network. Copayments may apply.

➢ See UPMC CHC Pharmacy Program, Pharmacy Services, Chapter J.

Closer Look at Prescription Drug Coverage
Providers who have questions about prescriptions should call Pharmacy Services at 1-800-396-4139 from 8 a.m. to 5 p.m., Monday through Friday.

UPMC CHC Participants can receive a 90-day supply of some maintenance medication prescriptions for the cost of one copayment through the 90-day retail pharmacy program.

➢ See Where to Obtain Prescriptions, Pharmacy Services, Chapter J.

Prosthetics and Orthotics
Prosthetic and orthotic services must be coordinated through a network provider.

Prosthetic and orthotic items on the Medical Assistance fee schedule are covered when medically necessary to treat congenital health defects or to improve function impaired by disease or accident.

Prosthetic and orthotic repairs and replacements are covered and require prior authorization.
Rehabilitative Therapy

Inpatient
Inpatient rehabilitative therapy (occupational, physical, respiratory, and speech) is covered when coordinated through the Participant’s PCP and delivered by a network provider. The therapy must be medically necessary and prior authorization must be obtained. The prognosis must indicate the potential for improvement.

Outpatient
Medically necessary outpatient rehabilitative therapy (occupational, physical, respiratory, and speech) is covered when coordinated through the Participant’s PCP and delivered by a network provider. All outpatient rehabilitation visits require a referral from the PCP.

Participants who are eligible for LTSS may qualify to receive additional therapy benefits.

➢ See Covered Benefits, UPMC CHC (Medical Assistance), Chapter N.

Reproductive Procedures

Abortion
An abortion may be covered when the mother’s life is in danger or pregnancy is the result of rape or incest.

An abortion is covered when a physician certifies that due to a condition, illness, or injury, an abortion is necessary to prevent the death of the woman, which is a medical judgment to be made by the certifying physician. A licensed physician may make the certification whether the physician has a pecuniary or proprietary interest in the abortion.

An abortion is covered for women who are victims of rape or of incest if:

- The rape victim makes a report to a law enforcement agency or public health service agency within 72 hours of the rape.
- The incest victim makes a report to a law enforcement agency or public health service agency within 72 hours of the time her physician informs her that she is pregnant.

The notification must occur before the abortion is performed.

The physician must complete a Physician Certification for an Abortion Form (MA-3 or MA-3s). This form must be maintained in the Participant’s medical record and a copy submitted with the claim.
Closer Look at Cases of Rape and Incest

In cases of rape or incest, the Participant must complete and sign a **Recipient Statement Form (MA-368)** before the abortion (the statement does not have to be notarized). The provider must submit a copy of the statement along with the claim. The statement must note that the Participant:

- Was a victim of rape or incest.
- Reported the incident, including the identity of the offender, if known, to the appropriate law enforcement agency. The statement must include the name of the agency as well as the date the report was made.
- Is aware that any false statements and/or false reports to law enforcement authorities are punishable by law.

The reporting requirement is waived if the Participant was the victim of rape or incest but, in the physician’s medical judgment, was physically or psychologically incapable of reporting the crime. The physician must give the reasons for the waiver on the Physician Certification for Abortion Form and must obtain a signed statement from the woman indicating she was a victim of rape or incest and that she did not report the crime. A Recipient Statement Form is not needed for abortions necessitated by life-threatening conditions, illnesses, or injuries.

**Hysterectomy**

A hysterectomy is covered when coordinated through a PCP or ob-gyn provider and performed by a network provider. The hysterectomy must be medically necessary and performed for a valid reason other than sterilization. A second opinion is not required, but the Participant may request one through her PCP or ob-gyn provider.

The provider and Participant must complete a **Patient Acknowledgement for Hysterectomy form (MA-30)**. The consent form must be maintained in the Participant’s medical record and a copy of the form must be submitted with the claim.

**Tubal Ligation**

A tubal ligation is covered when coordinated through a PCP or ob-gyn provider and performed by a network provider.

The Participant must voluntarily give informed consent to the procedure. The Participant also must sign a **Sterilization Consent form (MA-31 or MA-31s)** at least 30 days, but no more than 180 days, before the procedure to receive coverage. The consent form must be maintained in the Participant’s medical record and a copy of the form must be submitted with the claim.

**Vasectomy**

A vasectomy is covered when coordinated through a PCP and delivered by a network provider.

The Participant must voluntarily give informed consent to the procedure. The Participant also must sign a **Sterilization Consent form (MA-31)** at least 30 days, but no more than 180 days, before the procedure to receive coverage. The consent form must be maintained in the Participant’s medical record and a copy of the form must be submitted with the claim.
Specialist Care
Coverage is provided for specialty care when performed by a network provider with a referral from the PCP. Coverage is only for those services coordinated by the PCP. To ensure coverage, specialists must refer the Participant to network providers for laboratory testing and X-rays. Any additional services must be referred and coordinated through the PCP.

Out-of-network services and/or any care ordered by an out-of-network provider are not covered unless specifically approved by UPMC CHC. The out-of-network provider must obtain prior authorization by contacting Utilization Management at 1-844-849-2926.

Therapy
Outpatient therapy (chemotherapy, dialysis, and radiation) is covered with a prescription when performed at a network facility.

Urgent Care
Urgent care is defined as any illness, injury, or severe condition that, under reasonable standards of medical practice, would be diagnosed and treated within a 24-hour period and, if left untreated, could rapidly become an emergency medical condition.

Urgent care is covered when the Participant is temporarily absent from the approved service area. Additionally, such services may be provided under unusual and extraordinary circumstances within the approved service area when a network provider is temporarily unavailable and when such services are medically necessary and require immediate attention.

Closer Look at Urgent Care
If the Participant is unable to call the PCP before going to the emergency department and the Participant does not have an emergency medical condition, the emergency department should attempt to contact the PCP for approval before providing services. If the PCP does not respond within 30 minutes or cannot be reached, the emergency department or Participant should attempt to contact Provider Services at 1-844-860-9303. If the emergency department cannot reach UPMC CHC, it should provide the service and attempt to contact the PCP or UPMC CHC afterward.

Routine Vision Benefits
Routine Vision benefits are provided by Envolve Vision. Benefit coverage may vary. Contact the UPMC CHC Health Care Concierge Team with questions at 1-844-833-0523.

Participants receive:
- Routine vision exams twice a year.
- A $100 allowance toward eyeglasses (one frame and two lenses) or toward one pair of contact lenses and fitting per year (from prior service date). (If the Participant chooses standard eyeglasses or contact lenses that are within the allowance, there is no cost to the Participant. If the cost exceeds the allowance, the Participant will be responsible for any cost over the $100.)
- Glasses or contact lenses to treat aphakia (medical condition).
- Specialist eye exam with referral from PCP.
Women’s Health

Routine Ob-Gyn Services
Participants may self-direct care to a network ob-gyn provider for routine annual gynecological exams and obstetrical care.

Non-routine Ob-Gyn Services
Participants with women’s health problems may self-direct care to a network ob-gyn.

Family Planning
Participants may self-direct care to network or out-of-network providers and clinics for family planning and birth control services. These services enable individuals to voluntarily determine family size and should be available without regard to marital status, age, sex, or parenthood.

UPMC CHC Participants may access, at a minimum, the education and counseling necessary to make an informed choice about contraceptive methods, pregnancy testing and counseling, breast cancer screening services, basic contraceptive supplies such as oral birth control pills, diaphragms, foams, creams, jellies, condoms (male and female), implants, injectables, intrauterine devices, and other family planning procedures.

Closer Look at Family Planning
UPMC CHC acts as the primary carrier for family planning services, regardless of other coverage. If, however, a claim is received with another carrier’s Explanation of Benefits (EOB), UPMC CHC will coordinate benefits.

Pregnancy Care
Participants can self-direct care to a network ob-gyn provider for maternity care and prenatal visits. The ob-gyn provider must notify the Participant’s PCP in writing that the Participant is receiving maternity care.

➢ NOTE: UPMC CHC enrolls pregnant Participants in the UPMC Health Plan Maternity Program, which assesses pregnancy risks and offers Participants several prenatal services.

Health coaches* provide education by telephone and coordination of care with an emphasis on the psychosocial and socioeconomic issues that could affect a pregnancy. They are available to answer Participants’ questions and offer support and advice between their visits.

Closer Look at Health Coaches*
A health coach is a health care professional who specializes in the delivery of a wide spectrum of lifestyle programs for improving nutrition, increasing physical activity, quitting smoking or other tobacco use, managing weight, and more. They also deliver programs designed to help individuals better manage chronic health conditions such as diabetes, coronary artery disease, hypertension, asthma, and depression.
Obstetrical Needs Assessment Form (ONAF)
Ob-gyns and PCPs should complete a comprehensive assessment of the Participant’s physical, psychological, and emotional history. This information will be used to identify Participants at risk for complications in pregnancy and who would benefit from enrollment in the maternity program.

Closer Look at Maternity-Related Forms and Tools
Obstetrical Needs Assessment Form (ONAF)
Providers should complete the ONAF, and fax it to 412-454-8558. For questions about the form, or to obtain forms, providers may call the UPMC Health Plan Maternity Program at 1-866-778-6073.

Depression Screening Tools
Providers are required to screen pregnant Participants for depression both prenatally and post-partum using one of the 2013 DHS validated depression screening tools.

Screening tools for maternal depression are also available online at www.upmchealthplan.com in the “For Providers” page, “Resources & Information” section, under “EPSDT Clinical and Operational Guidelines.”

➢ See The Maternity Program, Utilization Management, Chapter G
➢ See Other Resources and Forms, UPMC CHC (Medical Assistance), Chapter N.
Linguistic and Disability Competency

In addition to Title VI compliance and ADA accessibility requirements outlined in Chapter B (Provider Standards and Procedures) of the UPMC Health Plan provider manual, CHC providers must also comply with the following minimum requirements as appropriate to their setting and services:

• Participants with physical disabilities (including those who use wheelchairs) must be able to independently access provider’s office via accessible route from parking lot or public transportation (includes being able to open doors, traverse sidewalks and entrances, approach check-in desk, enter exam room, etc.).

• Participants with physical disabilities (including those who use wheelchairs) must be able to access and use a restroom within the building in which provider’s office is located (preferably within provider’s office or suite).

• Provider must allow for extended appointment times to accommodate disability and communication need.

• Provider must provide foreign language, American Sign Language (ASL) and tactile interpreters upon request via onsite or video remote/over the phone interpreters.

• Provider must ask Participants at time of appointment scheduling if any disability or communication accommodations will be needed for the Participant’s visit.

• Providers must allow service animals to accommodate Participants and visitors during appointments.

• Providers must provide Participants with written communication in an alternative format upon request (Braille, large print, foreign language, audio, etc.).

• Provider must respond to disability complaints in a timely manner and keep record of such complaints.

ASL and foreign language interpreters should be scheduled in advance of Participant appointments and home visits. Providers who welcome Participants to their facilities and offices are encouraged to have access to Video Remote Interpreting (VRI) Services.

For additional information about interpreters, VRI or other disability-related accommodations, contact UPMC’s Disabilities Resource Center at 412-605-1483 or disabilitiesresource@upmc.edu. For assistance, contact Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.
Closer Look at Working With Interpreters
When working with interpreters, the provider should follow these tips for best communication with Participants:

- Have a direct conversation with the Participant, not the interpreter.
- Do not ask the interpreter questions about the Participant; allow Participant to provide all needed information.
- Before speaking, get the attention of the Participant (slight wave or shoulder tap).
- Face the Participant; avoid obstructing your face.
- Speak in normal tone and pace; the interpreter will let you know if you are speaking too quickly.
- Don’t make small talk with the interpreter (while excluding the Participant).

Closer Look at Alternative Format Documentation
It is the provider’s responsibility to provide alternative format documents to Participants who cannot utilize standard written communication. This includes all forms of written communication and may include formats such as foreign language, audio, Braille, and large print.

➤ NOTE: Audio, braille and large print formats can be obtained from the PA Association for the Blind.

All providers are required to demonstrate cultural, linguistic and disability competency by providing reasonable accommodations, using appropriate language when speaking to and about people with disabilities, and understanding barriers to accessing services such as transportation, communication, scheduling, attitudinal bias and structural inaccessibility. Cultural, linguistic and disability competency training will be provided during orientation.

Competency will be monitored and measured via on-site accessibility assessments, review of complaints and grievances and ongoing follow up by UPMC’s Provider Network Department. Questions regarding cultural, linguistic and disability competency can be asked by calling Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.
Alzheimer’s Disease and Other Dementias

Providing quality care to Participants with Alzheimer’s disease or other dementias can be challenging. It is important to understand the symptoms of these diseases and the care a Participant requires throughout the course of their disease. The links below will help you to better assess, diagnose and treat a Participant with Alzheimer’s disease or other dementia.

Other Services

**Other services available to UPMC CHC Participants include:**

**Health Management Programs**

UPMC CHC offers several health management programs, including asthma, cardiovascular disease (coronary artery disease and congestive heart failure), chronic obstructive pulmonary disease, and diabetes at no cost to the Participant. Health coaches are available to answer Participants’ questions and offer support and advice between their visits. Information about the programs is available at **1-866-778-6073** from 7 a.m. to 8 p.m. Monday through Friday and 8 a.m. to 3 p.m. on Saturday.

Health management programs are an important component of UPMC CHC efforts to improve Participants’ health by providing intensive case management for Participants with specific chronic illnesses.

The goals are to improve clinical outcomes and quality of life. The program is structured to identify Participants with chronic conditions, conduct outreach, assess Participants’ needs, develop a coordinated care plan that is created with Participants’ input, and monitor Participants’ progress with that plan. An assessment of Participants’ medical and behavioral health, compliance status, use of self-monitoring tools, and their understanding of the condition are completed to determine areas for focused education or care coordination. All interventions are aimed at increasing Participants’ knowledge of their condition and improving their ability to manage their disease.

A specialized team of health coaches (nurses, social workers, dietitians, exercise physiologists, counselors, and health educators), in collaboration with the Participants’ providers, work to accomplish these goals through Participant education, coordination of care, and timely treatment.

In addition, these programs provide help for Participants to manage their chronic illnesses through preventive practices and adherence to their treatment plans. Health management programs also help form connections with community support groups and agencies. There are also programs to assist with lifestyle risk goals such as smoking cessation, weight management, nutrition, stress management, and physical exercise. Participants enrolled in these programs receive educational materials and have frequent clinical sessions with their health coach.

Providers who serve Participants who would benefit from these health management programs should contact **Health Management** at **1-866-778-6073** for information and enrollment. Health Management staff is available Monday through Friday from 7 a.m. to 8 p.m. and Saturday from 8 to 3 p.m.

Additional information on health management programs can be found online at [www.upmchealthplan.com](http://www.upmchealthplan.com) in the “For Providers” page, “Resources & Information” section, under Patient Health.
UPMC MyHealth 24/7 Nurse Line

A round-the-clock advice line for Participants seeking general health advice or information regarding a specific medical issue.

Experienced registered nurses are available 24/7 to provide Participants with prompt and efficient services.

The UPMC MyHealth 24/7 Nurse Line is available for medical questions concerning both adults and children.

The Participant may call 1-866-918-1591. TTY users should call toll-free 711.
Services Already Approved by Another MCO or Fee-for-Service

If a Participant, upon enrolling in UPMC CHC is receiving services authorized by another Physical Health Managed Care Organization (PH-MCO) or by the Medical Assistance fee-for-service program, those services will continue for the length of time, quantity of services, and scope of services specified by the approved prior authorization. The length of time that the service will continue will vary depending on if the Participant is pregnant. However, the provider still must notify UPMC CHC with information regarding those services. Contact Utilization Management at 1-844-849-2926.

The Participant will continue to receive any prior authorized service up to 60 days after enrollment with UPMC CHC. Utilization Management will conduct a concurrent clinical review of all pertinent information to determine if the services are medically necessary beyond the initial authorization period.

For Participants who are pregnant:
If a pregnant Participant is already receiving care from an out-of-network ob-gyn provider at the time of enrollment, the Participant may continue (at her option) to receive an ongoing clinically appropriate course of treatment from that specialist throughout the pregnancy and postpartum care related to the delivery.

Before authorization from the previous PH-MCO or fee-for-service program expires, review standards for prior authorization and referral requirements.

➢ See Services requiring Prior Authorization, Utilization Management, Chapter G.

If a Participant, upon enrolling in UPMC CHC on the MCO’s initial start date in Participant’s zone, is receiving LTSS services authorized by another Service Coordination entity, or by the Medical Assistance fee-for-service program, those services will continue for at least 180 days, known as the Continuity of Care period. If a Participant is receiving LTSS services authorized by another Service Coordination entity and chooses to change MCOs, those services will continue for 60 days or until a comprehensive needs assessment has been completed and a person-centered service plan (PCSP) has been developed and implemented, whichever date is later.

Questions regarding continuity of care can be directed to Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.
Services Not Covered

The following services are not covered under the UPMC CHC program unless pre-approved (prior authorized) by Utilization Management. Contact Utilization Management at 1-844-849-2926 to determine if a service is eligible to be considered for a prior authorization:

- Acupuncture
- Experimental or investigative treatments
- Home and vehicle modifications
  - NOTE: CHC Participants with LTSS may be eligible for this service. See Covered Services for more information or call Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.
- Infertility services
- Medical services or surgical procedures and diagnostic tests performed on an inpatient basis that could have been performed in the provider’s office, the clinic, the emergency department, or a short procedure unit without endangering the life or health of the Participant
- Non-medically necessary treatments or surgery (e.g., cosmetic surgery)
- Out-of-network care, except for emergency services and family planning
- Self-directed care, except as noted in the Coordinated Care section.
  - NOTE: CHC Participants with LTSS may be eligible for certain self-directed care. See Covered Services for more information or call Provider Services at 1-844-860-9303 from 8 a.m. to 5 p.m., Monday through Friday.

See Coordinated Care, UPMC CHC (Medical Assistance), Chapter N.
Program Exception Process

The program exception process occurs when a provider requests Utilization Management review of a service that is not a covered benefit to determine if an exception should be made based on medical necessity. The process also applies to benefit limit exception requests for additional treatment for a Participant who has exhausted the benefit limit (i.e., duration or quantity) of a particular service.

The Utilization Management Department will consider requests by providers for program exceptions and benefit limit exceptions for UPMC CHC Participants.

Providers may submit requests for benefit limit and program exceptions to Utilization Management by calling 1-844-849-2926, faxing to 412-454-2057, or sending a letter to:

UPMC Health Plan  
Utilization Management  
U.S. Steel Tower  
600 Grant Street, 11th Floor  
Pittsburgh, PA 15219

A provider or the UPMC CHC Participant must submit the following information to request an exception:

• Participant’s name  
• Participant’s address and telephone number  
• Participant’s UPMC CHC Participant ID  
• A description of the service for which the provider or the Participant is requesting an exception  
• The reason the exception is necessary  
• The provider’s name and telephone number

The provider or Participant may request a benefit limit exception before or after the service has been delivered.

For an exception request made before the service has been delivered, UPMC CHC will respond within 21 days upon receipt of the request. If the provider indicates an urgent need for a quick response, UPMC CHC will respond within 48 hours upon receipt of the request. For an exception request after the service has been delivered, UPMC CHC will respond within 30 days upon receipt of the request.

An exception request made after the service has been delivered must be submitted no later than 60 days from the date UPMC CHC rejects the claim because the service is over the benefit limit. Exception requests made after 60 days from the claim rejection date will be denied.

Both the Participant and the provider will receive written notice of the approval or denial of the exception request. For exception requests made before the service has been delivered, if the provider or Participant is not notified of the decision within 21 days of the date the request is received, the exception will be automatically granted.
A provider may not hold the Participant liable for payment and bill the Participant for services that exceed the limits unless the following conditions are met:

- The provider advised the Participant, before the service was provided, that the Participant has exceeded the limits.

- The provider advised the Participant, before the service was provided, that he or she will be responsible for payment if the exception is not granted.

- The provider has requested an exception to the limit and the request was denied.

Closer Look at the Exception Process

To request a program exception for a UPMC CHC Participant, the provider should submit a request to Utilization Management and offer supporting information demonstrating the medical necessity of the exception.

When a Participant initiates a request, a Utilization Management case manager will obtain the necessary medical information from the provider. The medical director will review all requests for program exceptions to determine medical necessity.

Urgent pre-service requests are reviewed for medical necessity and a determination will be made within 24 hours. Providers will receive oral notification of the decision within 24 hours receipt of the request in addition to a written notification. The written notification is sent to the provider within 24 hours and a copy is sent to the Participant.

Non-urgent pre-service requests are reviewed for medical necessity and a determination will be made within two business days. Providers will receive oral notification of the decision within two business days of receipt of the request. In addition, the provider will receive written notification within two business days of the oral notification.

If the provider’s request is for the continuation of services that the Participant is currently receiving and the medical director’s medical necessity review results in termination or reduction of the service, the effective date of the termination of those services will be 10 days from the date of the denial letter. The services will continue at the previously approved level for an additional 10 days to allow the Participant the opportunity to appeal the decision. If the Participant requests an appeal within the required time frame, the previously approved level of service will continue until the appeal decision is rendered.
Closer Look at Benefit Limit Exceptions

**Benefit Limit Exception:**
An exception to service limits may be granted if the UPMC CHC Participant:

- Has a serious chronic illness or other serious health condition, and without the additional service, the Participant’s life would be in danger; or his or her health would get much worse, or
- Needs a costlier service if the exception is not granted, or
- It would be against federal law for UPMC Community HealthChoices to deny the exception.

**Dental Benefit Limit Exception:**
An exception to the dental benefit limits may be granted if:

- It is determined that the Participant has a serious chronic systemic illness or other serious health condition and denial of the exception will jeopardize the life of the Participant; or result in the rapid, serious deterioration of the health of the Participant; or
- It is determined that granting a specific exception is a cost-effective alternative for UPMC CHC, or
- It is determined that granting an exception is necessary to comply with federal law.
Service Coordination

Role of Service Coordinators
Service Coordinators are qualified individuals (nurses, social workers, or those with experience serving the Waiver program populations and hold a bachelor’s degree) who are the accountable point of contact for each Participant.

The Service Coordinator’s role includes the following activities:

- Provide information about available services, needs assessments and the Person-Centered Service Plan (PCSP) process.

- Identify, locate, coordinate, and assist Participants to gain access to needed LTSS, physical health, and behavioral health services.

- Inform Participants about service alternatives and delivery options including choice of service providers as well as opportunities for self-direction.

- Conduct person-centered, Comprehensive Needs Assessments and develop PCSPs and Care Plans.

- Oversee the implementation of PCSPs.

- Assist with durable medical equipment (DME), pharmacy, and ancillary services (e.g., dental, physical therapy).

- Arrange and schedule transportation to covered medical services through the Medical Assistance Transportation Program (MATP) as well as non-medical transportation to appointments, activities, and resources as identified on the PCSP.

- Promote wellness and encourage the utilization of preventive care services.

- Provide education to caregivers based on the Participant’s condition including symptoms and/or triggers of changing health and functional status and appropriate actions to take.

- Coordinate efforts and prompt Participants to complete redetermination process to maintain Medical Assistance eligibility.

- Assist Participants on the appeals and grievances processes as well as providing information about Participants’ rights including DHS Fair Hearing rights, risks and responsibilities, and assisting with fair hearing requests as needed.

For more information or to speak with a Service Coordinator, contact Service Coordination at 1-844-860-9302 (Southwest Pennsylvania), or 1-833-672-8078 (Southeast Pennsylvania), or 1-833-280-8508 (Remainder of Pennsylvania).
Role of the Provider for Participants who Receive LTSS

Providers have an integral role in the goal of seamless and continuous, Participant-centric care. To help achieve that goal, both medical and non-medical providers should:

- Actively engage with the Participant’s Service Coordinator to facilitate appointments, referrals, and treatment needs.
- Be aware of the services a Participant receives and any gaps in care identified on the PCSP.
- Communicate and work with the Participant to identify needs not identified on the PCSP.
- Provide care focused on prevention, improvement, and sustainment of health outcomes and independent living of the Participant.
- Be an active and collaborative Participant of the Person-Centered Planning Team (PCPT) to better understand and address the Participant’s needs.

It is important that providers engage with Service Coordinators when they are aware of a change in the Participant’s life that may impact or require updates to the PCSP for optimal health outcomes.

Examples of changes or situations that would prompt providers to engage with services coordinators include but are not limited to:

- Participants that have experienced a change in functional status or are given a new diagnosis.
- Participants admitted, transferred, or discharged to a hospital or nursing facility.
- Participants who need additional home services, adaptive devices, or adaptations.
- Participants who are not compliant with preventative or ongoing medical services.
- Providers have a concern about Participant’s living situation or home environment.
- Providers have noted a change in the Participant’s mood or behavior.

In addition to these changes, providers must report any suspected abuse and neglect through the appropriate channels.

➤ See Critical Incident Reporting, Community HealthChoices Chapter N

Every Participant has the right to choose or change his or her own provider for medical and non-medical services. Committed coordination and involvement in the Participant’s PCPT may decrease such changes and lead to more consistent care and services.
Person-Centered Planning Teams

A Person-Centered Planning Team is a group of people that includes the Participant, who collaboratively work together to coordinate care, minimize service disruption, and provide the broad expertise needed to help Participants with diverse and often complex conditions achieve their desired outcomes.

The PCPT is led by the Participant (or designated representative) to direct the process of his or her services to the maximum extent possible. The Participant selects the people that make up the PCPT for the overall planning of service delivery. The PCPT may include family members, alternative care givers, neighbors, friends, and providers such as the Primary Care Provider or servicing providers, and anyone else the Participant chooses to be a part of his or her overall care.

The PCPT approach encourages and supports the Participant to direct the process and to make informed choices and decisions. The PCPT works together to develop the PCSP, which includes the overall coordination of physical, behavioral, and support services as well as any goals and preferences expressed by the Participant.

The Service Coordinator initiates the PCPT, provides any training needed on PCPT participation, and facilitates service plan assignments necessary in support of the Participant. The Service Coordinator communicates with the PCPT as necessary to provide seamless coordination and limit disruption of services for the Participant.

Comprehensive Needs Assessment and Reassessment

A Comprehensive Needs Assessment is completed for all Participants that are Nursing Facility Clinically Eligible (NFCE). A Comprehensive Needs Assessment may also be completed for Participants that are not NFCE, but the Participant requests a needs assessment, self-identifies as needing LTSS, or is identified as having unmet needs, service gaps, or a need for service coordination.

An assessment is conducted in-person in the Participant’s home or primary residence, at a date and time convenient to the Participant. Through the assessment, and subsequent reassessments, the service coordinators assess a Participant’s physical, behavioral, social, psychosocial, functional, environmental, and LTSS needs.

Service Coordinators also assess the Participant’s caregiver(s) and/or natural/informal support system. Throughout the assessment process, Service Coordinators identify the Participant’s preferences and goals to develop the Person-Centered Service Plan and Care Plan with the Participant’s participation.

The assessment comprises key elements to identify and evaluate the Participant’s needs, including:

- Need for comprehensive care management or disease management of chronic conditions.
- Functional and/or cognitive limitations in performing ADL/IADLs, and support level needed.
- Ability to manage and direct finances and services independently.
- Level of supervision required.
• Supports for natural or unpaid caregivers.
• Assessment of the Participant’s or caregiver’s health and safety risks.
• Environmental challenges, including housing, to promote independence and safety.
• Availability of able and willing informal supports.
• Use of or need for adaptive devices.
• Preferences/goals for community engagement, employment, and/or education.
• Additional information gathered during the assessment that is not included in the tool but supplements the overall Participant assessment.
• Diagnoses, ongoing treatments, and medications

Reassessments are conducted no more than 12 months following the previous assessment, unless there has been a recent and unplanned event, such as a significant change in functional status or diagnosis, change in informal supports, or a change in the home environment.

In the event of a hospital discharge, a reassessment occurs within 48 business hours from the time the Service Coordinator is made aware of the discharge.

An assessment is conducted no later than five business days from the Participant’s start date for Participants who are eligible for LTSS but not receiving LTSS on their enrollment date and for dual eligible Participants identified by the IEB as having a need for immediate services.

Reassessments are also conducted if the Participant, caregiver, designated representative, provider, PCPT, or the Pennsylvania Department of Human Services requests a reassessment. In such case, a reassessment is conducted within 14 days of notification of the event or request for reassessment.

**Person-Centered Service Plans (PCSP)**

The PCSP is a written, holistic approach to addressing the Participant’s physical, cognitive, behavioral, social, and environmental needs. It is created no more than 30 days from the date of the Comprehensive Needs Assessment. The PCSP is created with the Participant or designated representative in a culturally and linguistically appropriate manner that fully incorporates the Participant’s preferences, strengths, goals, and expectations for their services. Service Coordinators assist the Participant in making informed choices about their services and getting access to covered services identified in the PCSP. The Participant has a right to request updates to the PCSP as needed.

**The PCSP comprises two key components:**

• The Care Plan
• The Service Plan
Care Plan:
Service Coordinators develop a holistic Care Plan that identifies and addresses how the Participant’s physical, cognitive, behavioral, social, environmental, and functional needs are addressed and coordinated.

The Care Plan includes:
- Chronic and non-chronic conditions including recent exacerbated conditions and disease management action steps.
- Cognitive needs.
- Current medications.
- All services authorized including the scope and duration of the services authorized.
- Needed physical and behavioral health care and services, including preventive care or requirements and a plan to coordinate the Participant’s Medicare, Veteran’s benefits, behavioral health benefits, Lottery-funded services, and other health coverage as needed.
- All designated points of contact authorized by the Participant who may request/receive information about the Participant’s services.

Service Plan:
The Service Plan documents all services necessary to support the Participant to live as independently as possible and be engaged in the community as much possible.

The Service Plan includes:
- All needs and preferences identified in the assessment including interventions, reasonable long and short-term goals, and measurable outcomes with anticipated time lines.
- Potential problems and how to minimize risks to foster a maximum functioning level of well-being.
- The Participant’s choice of service providers, including the Participant’s decisions about his or her service delivery model including Self-Directed care.
- A communications plan and individualized back-up plans, including a list of informal supports and services that are available, willing, and able to assist the Participant.
- How frequently specific services will be provided.
- Any telehealth or other technology used to assist the Participant.
- The person responsible for conducting interventions and monitoring outcomes, such as the Service Coordinator or a Participant of the PCPT.
- A plan for the Participant to access community resources, non-covered services and other supports including how to accommodate preferences for leisure activities, hobbies, community engagement, employment, and education goals.
Provider Critical Incident Reporting Requirements

Reporting Requirements
UPMC Community HealthChoices requires all network providers to report all Critical Incidents involving UPMC CHC Participants to the Participant’s Service Coordinator within 24 hours of discovery, and after ensuring the health and safety of the Participant. For all incidents that meet the state’s criteria for critical incidents, the direct service providers must report the incidents in the state’s Enterprise Incident Management (EIM) system within 48 hours. All investigations and follow up activities must be completed and documented in EIM within 30 days. Other providers may submit a typed critical incident form that is available on the Provider Services website www.upmchealthplan.com/providers/hcbs/resources to chc_critical@upmc.edu within 24 hours from the date of discovery and UPMC CHC will submit the incident in the state’s EIM system. Any type of provider may use the online form as an alternative reporting method if the EIM system is not working.

Requesting EIM access
Direct Service Providers must designate two people in their agency to become administrators for the EIM system. These system administrators will be responsible for developing EIM user accounts for other designated people in their agency who will report critical incidents when they occur. Information and a request form for EIM access can be requested through chc_critical@upmc.edu. If a provider already has EIM access, they do not need to complete this next step.

Training
Providers must participate in an EIM training to learn about the changes made to the system for Community HealthChoices Participants. Providers will have access to training webinars and education materials through the UPMC CHC Provider Services website. Providers must participate in trainings offered by UPMC CHC to ensure accurate and timely reporting all critical incidents. Trainings may be offered at webinars, online or in person at regional meetings.

Critical Incidents Categories
The following categories of incidents are considered reportable:

- **Death** (if suspicious in nature or unexpected only)
- **Serious injury** that results in emergency room visits, hospitalizations, or death
- **Unplanned hospitalization**
- **Provider or staff misconduct**, including deliberate, willful, unlawful, or dishonest activities
- **Emergency room visits**
• **Abuse**, which includes the infliction of injury, unreasonable confinement, intimidation, punishment, mental anguish, or sexual abuse of a Participant. Types of abuse include, but not limited to:
  o Physical abuse, defined as a physical act by an individual that may cause physical injury to a Participant.
  o Psychological abuse, defined as an act, other than verbal, that may inflict emotional harm, invoke fear, or humiliate, intimidate, degrade or demean a Participant.
  o Sexual abuse, defined as an act or attempted act, such as rape, incest, sexual molestation, sexual exploitation, or sexual harassment and/or inappropriate or unwanted touching of a Participant.
  o Verbal abuse, defined as using words to threaten, coerce, intimidate, degrade, demean, harass, or humiliate a Participant.

• **Neglect**, which includes failure to provide a Participant the reasonable care that he or she requires, including, but not limited to food, clothing, shelter, medical care, personal hygiene, and protection from harm. Neglect includes:
  o Seclusion, which is the involuntary confinement of an individual alone in a room or an area from which the individual is physically prevented from having contact with others or leaving, is a form of neglect;
  o Abandonment, which is the desertion by anyone who assumed caregiving responsibilities for a CHC Participant.

• **Exploitation**, which is an act of depriving, defrauding, or otherwise obtaining the personal property from a Participant in an unjust or cruel manner against one’s will or without one’s consent or knowledge for the benefit of self or others.

• **Restraint**, which includes any physical, chemical, or mechanical intervention that is used to control acute, episodic behavior that restricts the movement or function of the individual or a portion of the individual’s body. Use of restraints and seclusion are both restrictive interventions, which are actions or procedures that limit an individual’s movement, a person’s access to other individuals, locations, or activities, or restricts Participant rights.

• **Service interruption**, which includes any event that results in the Participant’s inability to receive services that places his or her health and or safety at risk. This includes involuntary termination by the provider agency, and failure of the Participant’s back-up plan. If these events occur, the provider agency must have a plan for temporary stabilization.

• **Medication errors** that result in hospitalization, an emergency room visit, or other medical intervention.

• **Any Preventable Serious Adverse Events (PSAEs)** discovered in a nursing facility must be reported in compliance with the Office of Long-Term Living Bulletin #03-14-08 issued 09/13/2014 and effective 10-01-2014. The facility must also notify UPMC CHC on the claim and email it to hpqualityreview@upmc.edu.
Immediate First Steps for Suspected Abuse, Neglect, Exploitation Incidents

Any provider, Service Coordinator, subcontractor, or UPMC employee who observes or has reasonable cause to suspect that abuse, neglect, exploitation, abandonment, or suspicious or unexpected death has occurred with a CHC Participant are mandatory reporters and must:

1. **Take immediate action to ensure the Participant’s health and safety.** If the Participant’s health or well-being is in imminent danger, notify emergency first responders (911).

2. **Make a verbal report to the state Adult Protective Services (APS) Hotline at 1-800-490-8505.** Any questions requiring immediate attention outside of regular business hours should be directed to the APS’ contractor - Liberty Healthcare’s on-call staff at 1-888-243-6561. Please note this number should only be used for emergency situations requiring immediate attention.

3. **Then call the Participant’s UPMC CHC Service Coordinator within 24 hours,** if that number can be located. If there is no answer, then:
   a. **Make a verbal report to the UPMC CHC Health Care Concierge Team at 1-844-833-0523 within 24 hours.**
      i. At a minimum, the verbal report must include Participant’s full name, date of birth, date and time of incident, a brief description of the incident, Participant’s current condition, and actions taken to mitigate risk to the Participant; and
      ii. The reporter’s name, agency, and contact information.

4. **Submit a critical incident report** to the state’s EIM system.

Possible Actions Needed After an Incident
To protect the safety of the Participant, actions that can be taken immediately by a provider include but are not limited to the following:

- **Contact 911** if the incident can cause or did cause immediate/severe harm to the Participant.

- **Remove worker from the Participant’s services** (if incident includes allegation of improper behavior by that worker).

- **Remove accused worker from servicing any UPMC CHC Participant until the investigation is complete.** This may take up to **30 calendar days.**

- **Interview involved employee(s) as soon as possible following the incident.**

- **Have the employee(s) submit a written account of events.**

- **Electronically submit these written accounts to chc_critical@upmc.edu**

- **Obtain fax numbers, phone numbers, or email addresses for UPMC CHC staff by calling the UPMC CHC Health Care Concierge Team at 1-844-833-0523.**
Follow-Up Responsibilities
Providers must cooperate fully in the investigation of reported critical incidents, including submitting all requested documentation within specified timelines. If the incident involves an employee of a HCBS provider, the provider must also submit within 20 calendar days of the incident a written report of the incident, including actions taken.

Based upon the severity of the incident, any identified trend or failure on the part of the provider to cooperate with any part of the investigation, the provider may be required by UPMC Health Plan to submit a written plan of correction to address and correct any problem or deficiency surrounding the critical incident. Corrective Action Plan templates can be found on the UPMC CHC Provider Services website at www.upmchealthplan.com/providers.
MA Provider Compliance Hotline

If you have knowledge of suspected MA provider noncompliance, recipient or provider fraud, waste or abuse, or of substandard quality of care for services paid for under the Pennsylvania Medical Assistance Program, please contact the **MA Provider Compliance Hotline** by calling 1-866-379-8477.

**Recipient fraud** is defined as someone who receives cash assistance, Supplemental Nutritional Assistance Program (SNAP) benefits, Heating/Energy Assistance (LIHEAP), child care, medical assistance, or other public benefits AND that person is not reporting income, not reporting ownership of resources or property, not reporting who lives in the household, allowing another person to use his or her ACCESS/MCO card, forging or altering prescriptions, selling prescriptions/medications, trafficking SNAP benefits or taking advantage of the system in any way.

**Provider fraud** is defined as billing for services not rendered, billing separately for services in lieu of an available combination code; misrepresentation of the service/supplies rendered (billing brand named for generic drugs; upcoding to more expensive service than was rendered; billing for more time or units of service than provided, billing incorrect provider or service location); altering claims, submission of any false data on claims, such as date of service, provider or prescriber of service, duplicate billing for the same service; billing for services provided by unlicensed or unqualified persons; billing for used items as new.

Reported problems will be referred to the Office of Administration's Bureau of Program Integrity for investigation, analysis, and determination of the appropriate course of action.

The hotline number operates Monday through Friday from 8:30 a.m. to 4 p.m. Callers may remain anonymous and may call after hours and leave a voice mail if they prefer.
Participant Complaint and Grievance Procedures

UPMC CHC Participants have a Complaint, Grievance, and Fair hearing process available to them if they are unhappy about services provided by UPMC CHC or their provider.

In order for the provider to represent the Participant in the conduct of a Grievance, the provider must obtain the written consent of the Participant and submit the written consent with the Grievance. A provider may obtain the Participant’s written permission at the time of treatment. A provider cannot require a Participant to sign a document authorizing the provider to file a Grievance as a condition of treatment.

The written consent must include all the following:

- The name and address of the Participant, the Participant’s date of birth and identification number.
- If the Participant is legally incompetent, the name, address, and relationship to the Participant of the person who signed the consent.
- The name, address, and UPMC CHC identification number of the Provider to whom the Participant is providing consent.
- The name and address of UPMC CHC.
- An explanation of the specific service or item which was provided or denied to the Participant to which the consent will apply.
- The following statement: “The Participant or the Participant’s representative may not submit a Grievance concerning the service or item listed in this consent form unless the Participant or the Participant’s representative rescinds consent in writing. The Participant or the Participant’s representative has the right to rescind consent at any time during the Grievance process.”
- The following statement: “The consent of the Participant or the Participant’s representative shall be automatically rescinded if the provider fails to file a Grievance or fails to continue to prosecute the Grievance through the review process.”
- The following statement: “The Participant or the Participant’s representative, if the Participant is legally incompetent, has read, or has been read, this consent form, and has had it explained to his/her satisfaction. The Participant or the Participant’s representative understands the information in the Participant’s consent form.”
- The dated signature of the Participant, or the Participant’s representative, and the dated signature of a witness.
For a detailed summary of the Participant Complaint and Grievance Procedures, please see the UPMC Community HealthChoices Participant Handbook at: www.upmchealthplan.com/cht/members/documents-and-resources.

For an expedited complaint or grievance, the provider must indicate in writing that a Participant’s life or health is at risk. UPMC CHC will send a letter within 48 hours of receiving the provider certification or three business days of receiving the Participant’s request for an expedited review, whichever is sooner, informing the Participant of its decision.

- **NOTE:** The UPMC CHC Participant Complaint, Grievance and Fair hearing process is separate and distinct from the Provider Dispute process outlined in Chapter B, Provider Standards and Procedures.

- See *Provider Disputes*, Provider Standards and Procedures, Chapter B
Provider Monitoring

The UPMC Community HealthChoices Provider Monitoring Team is responsible for ensuring that UPMC Health Plan-enrolled LTSS providers, actively serving UPMC CHC Participants, are compliant with all standards and requirements set forth in 55 Pa. Code Chapter 52, Community HealthChoices 1915(c) Waiver, the Community HealthChoices Agreement between UPMC Health Plan and DHS, and the UPMC Health Plan Provider Agreement and Provider Manual.

The Provider Monitoring Team will conduct on-site monitoring of LTSS providers at least once per two-year period. More frequent monitoring may be necessary based on complaints, critical incidents, or other issues identified by UPMC Health Plan.

During these on-site monitoring meetings, the Provider Monitoring team’s review will include, but not be limited to, verification of required policies and procedures, and review of employee files (including background checks and licensure, when appropriate).

LTSS Providers must have established qualifications (e.g., job descriptions) for each position, conduct background checks on all employees who provide direct care to Participants, and utilize an additional tool (e.g., an interview or, reference checks) for each paid employee hired. Providers must share documentary evidence of these requirements for each employee with UPMC Health Plan upon request.
Electronic Visit Verification

UPMC Health Plan requires the use of Electronic Visit Verification (EVV) for certain Home and Community Based Services. As of January 1, 2020, EVV must be used for all Personal Assistance Services (PAS) or Respite Services provided to UPMC Community HealthChoices participants by HCBS Providers.

In order to fulfill the EVV requirement, the following data must be captured and provided to UPMC Health Plan:

- Type of service performed
- Participant receiving the service
- Individual providing the service
- Date of the service
- Location of service delivery
- Time the service begins and ends

All data must be remitted using procedures communicated to HCBS Providers by UPMC Health Plan. EVV data must be unedited to be considered valid. If there are any changes to the original timestamp, HCBS Providers must also provide the following additional information:

- The name of the individual who authorized the change
- The reason the change was made

HCBS Providers will be monitored for compliance with EVV requirements, in accordance with UPMC Health Plan policies and procedures.

UPMC Health Plan’s policies and procedures regarding EVV will be updated from time to time. Failure to comply with UPMC Health Plan policies and procedures regarding EVV may result in a Provider Corrective Action Plan and/or non-payment for services.

Please refer to the EVV Section on UPMC Health Plan’s secure Provider OnLine website for the most current requirements, compliance and guidelines for EVV.

UPMC CHC will follow DHS requirements for EVV implementation dates for Home and Community Based Services other than PAS and Respite Services.
